Report of SUPERINTENDENT OF SCHOOLS

Holden, Mass., Jan. 1, 1935

To the School Committee of Oakham:

I have the honor to submit my seventeenth report, the thirty-fifth in the series since the formation of the present School Union.

It has been said many times and proven in experience that a school is as good as its teachers. Oakham is justly proud of her teachers and of her schools and most fortunate in having so few changes in personnel. These are days of unrest, of uncertainty and of change, but our teachers are alert and progressive, and we are able to record another year of successful achievement.

We are thinking of Education today as guided growth. From the time the child first enters school we keep this thought before us, helping him to acquire simple habits of daily living, to build these habits and attitudes into the fine character of worthy manhood and womanhood, working with the home, the church and all positive forces for good, to assist him to achieve for himself the well-known seven objectives: a sound mind in a strong healthy body, a home life that is happy, unselfish and democratic, the ability to think, study and act, the knowledge and skill needed to earn a good living, the wise use of leisure, intelligent citizenship, fine spiritual character. This is our ideal for a fair start in life for every child.

The usual club and extra-curricular activities have been carried on with enjoyment and profit to all. Plans are already completed for another Dental Clinic to be conducted this winter. Our sincere thanks are due to Dr. Scott for her services, and to the School Nurse and School Physician for their help in achieving our objective of health.

The school building and class-rooms are in excellent condition. The walls and ceilings were painted during the summer, the desks refinished and the windows screened. A new series of geography texts has been introduced and new maps purchased. Work-books are provided for the pupils in arithmetic, English and primary reading. There are new music books in the primary room.

There are many excellent radio programs offered for schools of which I hope we shall be able to take advantage. During American Education Week there were special programs dealing with new types of schooling, the improvement of schools in the smaller communities, civic responsibility and character training. We look forward to enriching the program through greater emphasis on visual education. A radio and some type of projection machine would be in keeping with the newer methods of instruction.

Though we have been without special teachers in music and drawing, these subjects have been taught with excellent results. In the annual poster contest and in the regular work as displayed on the school-room walls, we have evidence of this. Henry Lupa was awarded first prize, Yvonne Agar second prize and Fred Stone honorable mention, in the contest.

Our teachers attended the Institute held in Holden in the fall, and your superintendent has attended the State and County meetings. Each year there is held in Worcester a Conference of School Committee members under the direction of the State Board of Education, and here are discussed many of the problems that come to School Committees, as well as school finances and legislation.

I refer you to the reports of the School Nurse and School Physician which follow, and the tables of statistics which give the membership, attendance, list of graduates and other matters of record.

In the annual report of the State Department of Education we find the following tables:

Total expenditure for schools for year ending Dec. 31, 1933

Between pupils and teachers there is a splendid spirit of loyalty and understanding. It should be said further, that the Oakham School Committee has continually shown this same loyalty to the welfare of our boys and girls, and a fine understanding of their functions as Directors of the business of Education in Oakham. I am very grateful for their friendship and support.

Respectfully submitted,

JAMES R. CHILDS.

REPORT OF THE SCHOOL NURSE

To the Superintendent of Schools:

The report of the dental clinic started in May is as follows:

Number of children examined	60
Number of children found with dental defects	51
Number of children receiving care at clinic ..	51
Number of cleanings	51
Number of permanent fillings	172
Number of permanent extractions	27
Number of temporary extractions	91

We are planning for another clinic early in 1935 in charge of Dr. Scott.

In June seven children were examined and vaccinated at a pre-school clinic. Dr. Knowlton was the examining physician and

made a report to the parents. Soon after the close of the clinic some of the defects had been corrected, which meant that the children had the entire summer in which to recuperate.

The general health of the pupils has been good this year. There have been a few colds, but nothing to keep the children away from school for long periods.

The annual physical examinations by Dr. Knowlton still show some defects which are not being corrected. There are some however which have been taken care of, and the children are now receiving the benefit of better health conditions.

Home visits	15
Class room inspections	25

I wish to thank the parents and children for their co-operation this year. I wish to thank especially the teachers for their loyal support, and the ladies who helped with the pre-school clinic.

Respectfully submitted,

AMREAU B. BLOOD, R. N.

REPORT OF THE SCHOOL PHYSICIAN

To the Superintendent of Schools:

The following is the report of the medical examination in the Oakham School for 1934. This examination includes teeth, nose, throat, heart, lungs, glands, skin, as well as posture and nutrition. There was a total of 170 defects and suitable notices were sent to the parents. There has been noticeable cooperation in attending to these defects.

The Pre-School Clinic was well attended and parents notified of any physical defects which might interfere with the future welfare of the child.

I wish to thank the Superintendent and teachers for their uniform courtesy and help.

Respectfully submitted,

WILLIAM T. KNOWLTON, M. D.
